7.		Designing Architectural and ER Diagrams for Project Structure		
8.		Testing - Test Plans and Test Cases		
9.		Load Testing and Performance Testing		
10.		Github: Project Structure & Naming Conventions		

AZURE DEVOPS ENVIRONMENT SETUP:

1. Open your web browser and go to the Azure website: <https://azure.microsoft.com/en-us/get-started/azure-portal>.

Sign in using your Microsoft account credentials.

If you don't have a Microsoft account, you can create one here:

<https://signup.live.com/?lic=1>

2. Azure home page:

3. Open DevOps environment in the Azure platform by typing **Azure DevOps Organizations** in the search bar.

4. Click on the My Azure DevOps Organization link and create an organization and you should be taken to the Azure DevOps Organization Home page.

AZURE DEVOPS PROJECT SETUP AND USER STORY MANAGEMENT:

1. Create the First Project in Your Organization

a. After the organization is set up, you'll need to create your first project. This is where you'll begin to manage code, pipelines, work items, and more.

b. On the organization's Home page, click on the New Project button.

c. Enter the project name, description, and visibility options:

Name: Choose a name for the project (e.g., LMS).

Description: Optionally, add a description to provide more context about the project.

Visibility: Choose whether you want the project to be Private (accessible only to those

invited) or Public (accessible to anyone).

d. Once you've filled out the details, click Create to set up your first project.

2. Once logged in, ensure you are in the correct organization. If you're part of multiple organizations, you can switch between them from the top left corner (next to your user profile). Click on the Organization name, and you should be taken to the Azure DevOps Organization Home page.

The screenshot shows the Azure DevOps Organizations page for a user named Pradhikshya Anand. The page is viewed in a web browser with the URL `aez.dev.azure.com/me?mkt=en-US`. The browser's address bar shows the Microsoft logo and the user's name, Pradhikshya Anand, with a "Sign out" link. The page header includes the Microsoft logo and the user's name. The main content area is divided into two sections. On the left, the user's profile is displayed, featuring a green circular avatar with the letters "PA". Below the avatar, the user's name "Pradhikshya Anand" is shown, along with an "Edit profile" button. The user's email address, `pradhikshyaanand.2024.aiml@rajalakshmi.edu.in`, is listed. A dropdown menu shows "Microsoft account". Below this, the location "India" and the email address are repeated. A section titled "Visual Studio Dev Essentials" provides a link to "Use your benefits". On the right, the "Azure DevOps Organizations" section is shown, with a "Create new organization" button. Below this, a list of organizations is displayed, including `dev.azure.com/pradhikshyaanand` (Owner). Under the "Projects" heading, two projects are listed: "Appointment_Booking_System" and "Online_Appointment_Booking_System". An "Actions" column next to these projects includes a link to "Open in Visual Studio". A "New project" link is also present. The bottom of the page shows a Windows taskbar with various application icons, a search bar, and the system clock indicating 10:24 on 06-04-2026.

3. Project dashboard

4.To manage user stories:

a. From the left-hand navigation menu, click on Boards. This will take you to the main Boards page, where you can manage work items, backlogs, and sprints.

b. On the work items page, you'll see the option to Add a work item at the top. Alternatively, you can find a + button or Add New Work Item depending on the view you're in. From the Add a work item dropdown, select User Story. This will open a form to enter details for the new User Story.
